3. Claims 1-22 are allowed over the prior art of record.
4. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest a method for constructing and designing a circuit for controlling an electromagnetic actuator, where the electromagnetic actuator includes a coil having associated therewith a resistance R_1 and an inductor L_1 , comprising modeling the electromagnetic actuator with an equation; calculating at least one resistance R_{2j} and at least one inductance L_{2j} , each of which is associated with at least one theoretical coil electrically connected to and physically remote from the electromagnetic actuator, where the resistance R_{2j} and the inductance L_{2j} are calculated by to satisfy the equation using at least the function as defined in the claims; and electrically connecting current supply means to the coil of the electromagnetic actuator, where the current supply means are configured to substantially simulate the electrical effect of each theoretical coil having the calculated resistance R_{2j} and the calculated inductance L_{2j} .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
